

DOCUMENT TYPE: System Output Template

WORKFLOW STEP: 5 (Agenda Generation)

LOGIC SOURCE: Conditional Logic Database (Sheet)

DISCOVERY CALL AGENDA: Logistics Solutions Inc.

Date: [Upcoming Business Day]

Attendees: [Client Name], [Operations Team Name]

Goal: Define the highest-impact area for AI integration in your operational workflow.

I. Meeting Overview & Context

(AI ENGINE INSERTS SUMMARY HERE) *(Logic: The system pulls the last 3 emails and the calendar invite title to draft a concise, warm summary of why we are meeting. This ensures we start with aligned expectations.)* #### II. Strategic Alignment

(LOGIC DATABASE INSERT) *(Logic: The system identifies the client's Industry as "Logistics" in the CRM and inserts the pre-approved sector-specific value proposition from the Conditional Logic Database. This ensures brand consistency.)* #### III. Discussion Points & Discovery Questions

(STANDARD DISCOVERY SET) *(Logic: The system inserts the standard Discovery Questions template to ensure no critical data point is missed during the interview.)* * What is the primary constraint limiting your current operations (cost, time, or compliance)?

- Describe your current vendor onboarding and auditing process.
- What is your biggest fear regarding AI implementation in logistics?

IV. Next Steps & Resources
